CKEditor 4 - Rich Text Editor Plugin Plugin Documentation

This plugin allows you to install CKEditor - the Smart WYSIWYG HTML Rich Text editor which can be used to edit the Full Description on Products, Categories and well as Blog and Topics Text.

CKEditor 4

Proven, enterprise-grade WYSIWYG HTML editor with wide browser compatibility, including legacy browsers.

- Paste from Word, Excel and Google Docs. Excellent tables support with columns resizing, selecting rows and columns.
- Media embeds (insert videos, tweets, Instagram posts and more), widgets, code snippets, math formulas.
- Autocomplete, @mentions, emoji 😳 plugins.
- Inline and iframe UI, autogrow, maximize mode for distraction-free writing. Read-only mode.
- Various styling and formatting plugins, copy formatting feature.

For more information on CKEditor see https://ckeditor.com/

Administration

The backend Administration has several pages where rich text can be edited

- Edit Product
- Edit Category
- Topics
- Message Templates

For each of these functions the CKEditor is utilised.

Enable

Click to enable the Plugin

Purchased Licence Keys

When you first install the plugin Demonstration keys will be automatically generated. The plugin can be operated in demo mode for 14 days. The purchase licence keys will be provided via email normally within 1 day after purchase. The purchase licence keys can then be entered as follows:

Public Key

This is the plugin licence public key provided. When you first install the plugin a Demonstration key will be saved. Change this value to the Public key suppled in the email when received.

Private Key

This is the plugin licence public key provided. When you first install the plugin a Demonstration key will be saved. Change this value to the Private key suppled in the email when received.

Using CKEditor Configuration

CK Editor has configuration options which are stored in config file in the plugin directory

See nopCommerce/Plugins/SSI.Editor.CKEditor/Scripts/CKEditor/config.js

For example, you can set the Height of the Editor using

config.height = 500;

All the setting options can be found here <u>https://ckeditor.com/docs/ckeditor4/latest/api/CKEDITOR_config.html</u>

Edit the config.js file then restart the application for the settings to take effect

Contact Us

If you have any more questions or would like to make suggestions on how to make the plugin operations more functional please email: <u>sales@selectsystems.com.au</u>
